Every year, we award the authors of the 10 most successful IMACS papers published in APNUM and MATCOM during the past year (in 2011). In recognition of their appreciated contributions, the authors and coauthors of these papers are granted IMACS Honor Members for one year (2012).

The lists of these papers, sorted by (decreasing) downloads follow:

**Applied Numerical Mathematics**

P. Deuring, M. Mildner, Error estimates for a finite element-finite volume discretization of convection-diffusion equations, APNUM 61 (2011) 785-801

S. Zhu, Q. Wu, C. Liu, Shape and topology optimization for elliptic boundary value problems using a piecewise constant level set method, APNUM 61 (2011) 752-767

**Mathematics and Computers in Simulation**

M. Heydari, H. Salarieh, M. Behzad, Stochastic chaos synchronization using Unscented Kalman-Bucy Filter and sliding mode control, MATCOM 81 (2011) 1770-1784

E. Mahmoudi, The beta generalized Pareto distribution with application to lifetime data, MATCOM 81 (2011) 2414-2430

S. Garcia, A periodic, chaotic lid-driven square cavity flows, MATCOM 81 (2011) 1741-1769
S.C. Huang, Wavelet-based multi-resolution GARCH model for financial spillover effects, MATCOM 81 (2011) 2529-2539
M. Amiri, E. Davoodi-Bojd, F. Bahrami, M. Raza, Bifurcation analysis of the Poincare map function of intracranial EEG signals in temporal lobe epilepsy patients, MATCOM 81 (2011) 2471-2491
